

Claim Enhancements for Stripette® Serological Pipets

CORNING

We are pleased to announce three claim enhancements to our Stripette serological pipet portfolio. In the spirit of continuously evolving to support the changing needs of our customers, we are implementing upgrades in the form of increased sterility assurance level, a human DNA-free claim, and availability of extractables data.

Human DNA-free

The serological pipets will now feature a human DNA-free claim.

Pipets will be tested by DNA detection assay per ISO 18385 and found to be free of detectable human DNA. The limit of detection is 10^{-11} g of human genomic DNA.

Extractables data

Extractables analysis will be conducted in accordance with USP <665>. Data will be made available upon customer request.

Sterility Assurance Level (SAL) of 10^{-6}

The serological pipets are sterilized and dosimetrically released per the requirements of ANSI/AAMI/ISO 11137.

The sterility of the upgraded products will be increased from an SAL of 10^{-3} to 10^{-6} .

Ordering Information

Individually Wrapped, Clear Plastic Wrap

Cat. No.	Capacity (mL)	Graduations (mL)	Negative Grads. (mL)	Color-coded Stripe	Qty/Pk	Qty/Cs
4011	1	1/100	0.2	Yellow	50	1,000
4012	1	1/100	0.2	Yellow	50	200
